

 **MULTIMO**

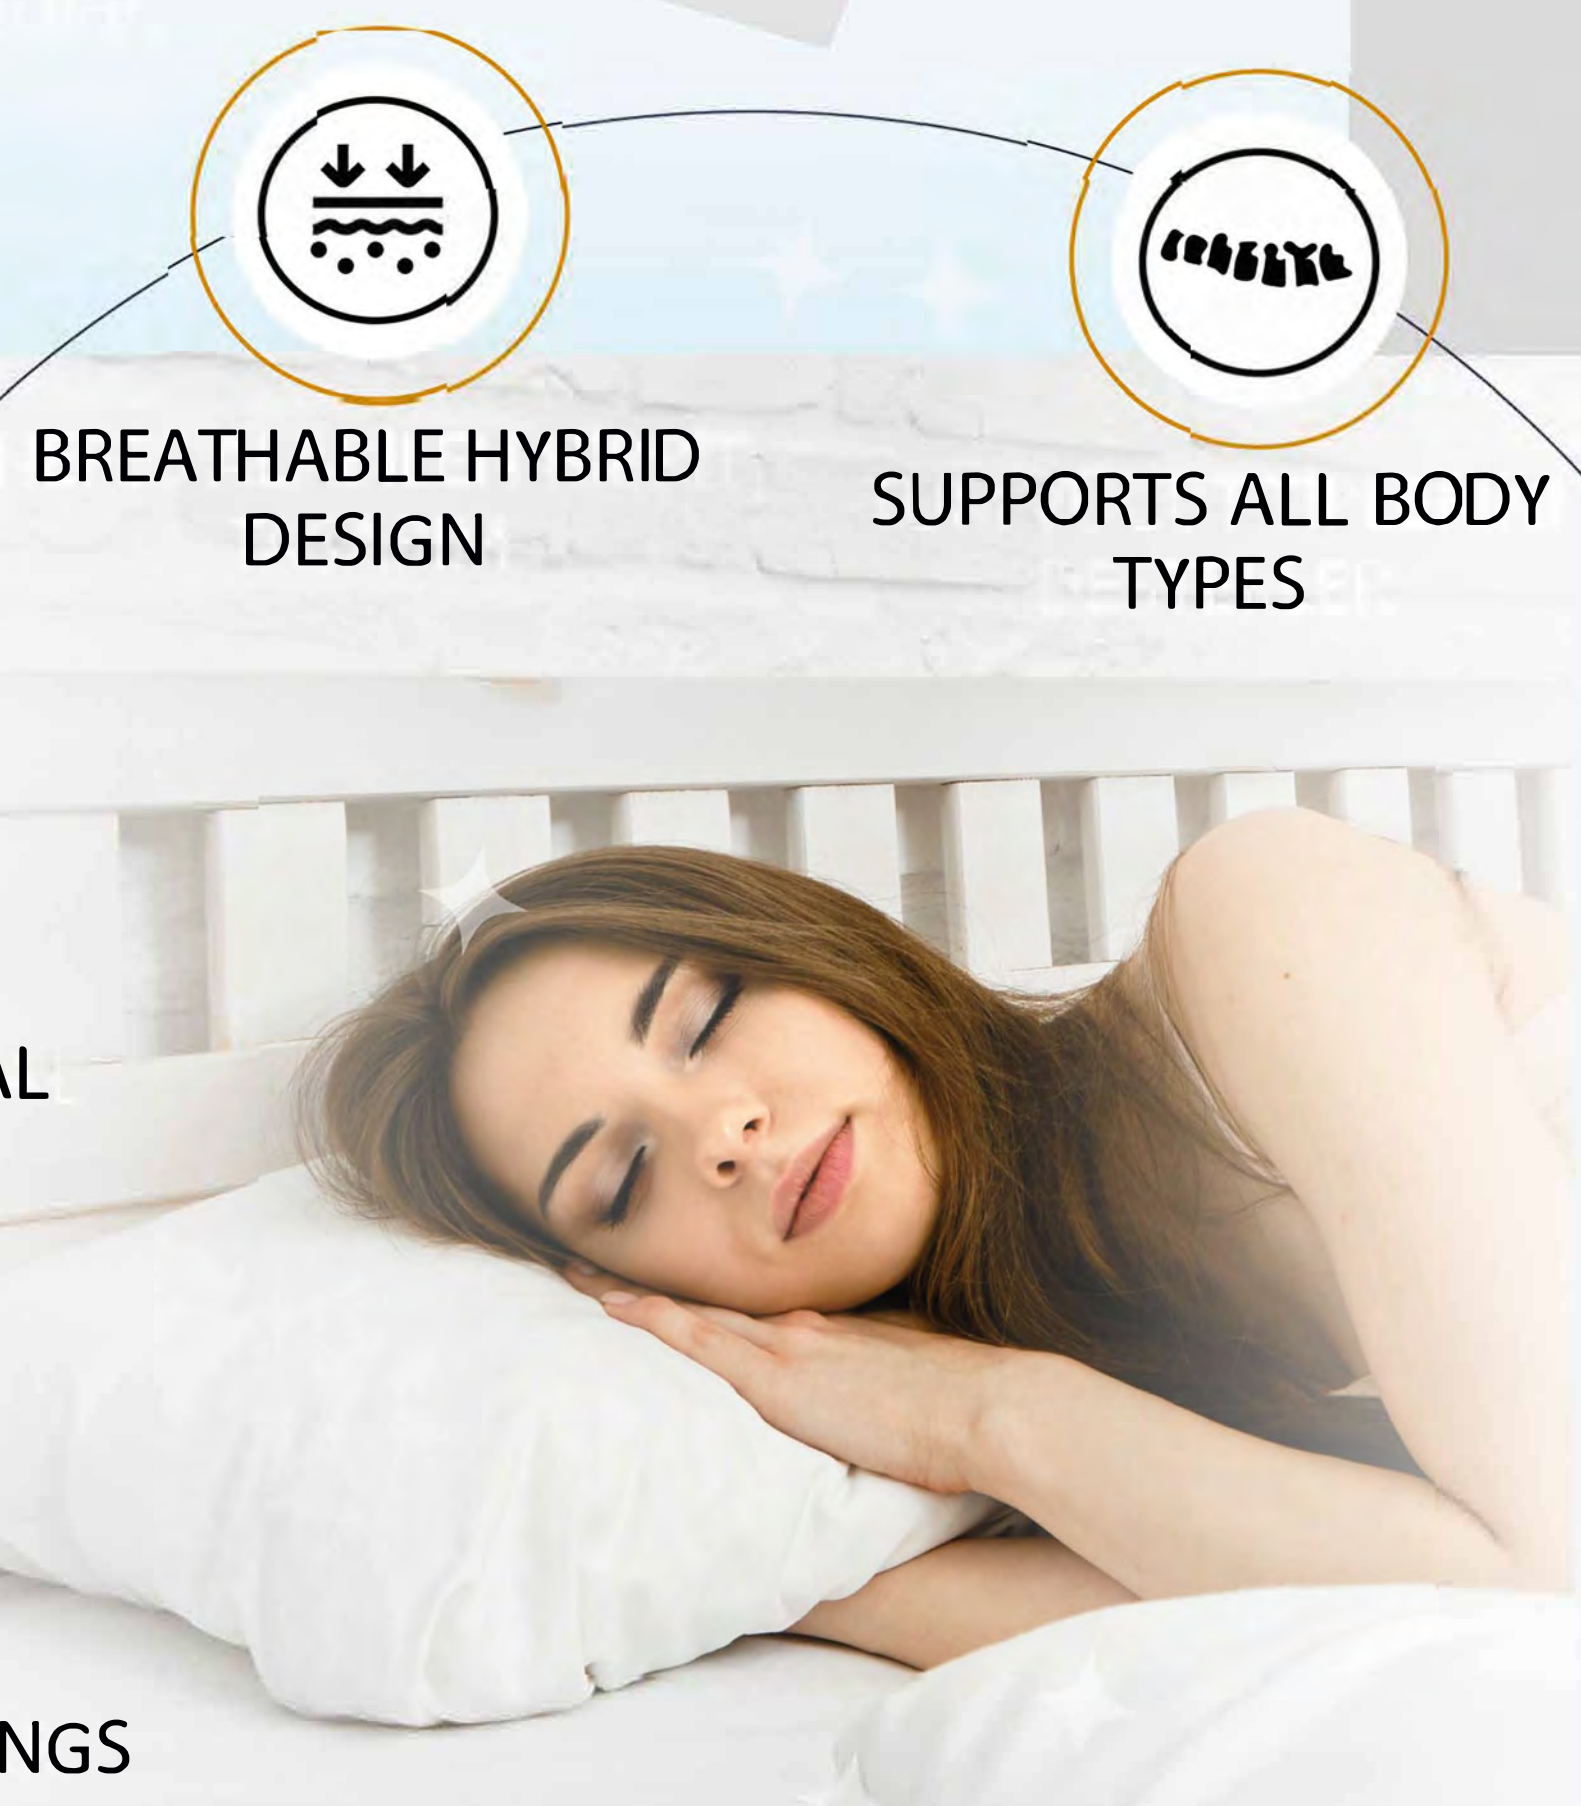

## Improved Comfort and Hygiene

"Our mattress is designed to accommodate every body type and maintain spinal alignment, constructed from carbon steel produced through tempering, and equipped with durable, deformation-resistant, and heat-resistant independent springs. It features a hybrid structure with breathable foam, fiber, fabric, felt, and cotton barriers to regulate body temperature. Additionally, it offers effective protection against bacteria, mites, bedbugs, and viruses through Hycare hygiene protection and nanotechnology."

**MEDIUM HARD**

\*It is medium hard when compared to market mattresses.

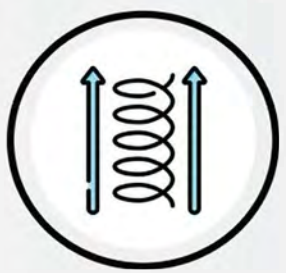

MULTIMO

"The Hycare hygiene protection technology in the fabric helps prevent the formation and survival of many types of bacteria, mites, and viruses."

"Our springs are produced using a 'thermal treatment' technology that preserves the properties of the steel. This prevents wire deformation and ensures long-lasting durability. The carbon content minimizes overheating and static electricity retention."

"It is produced using a pocket spring system, where individual springs are placed inside fabric pockets. This way, the springs in separate pockets allow couples with different weights, heights, and sleeping positions to remain unaffected by each other's movements during sleep."

- Sensitive to all body weights.
- Designed to adapt to ali body types and maintain spinal alignment
- it has a hybrid structure with breathable sponge, fiber, fabric, felt and cotton barriers that preserve body heat.

### Definitive Solution to Edge Collapse

"Our springs feature metal horizontal frames at both the top and bottom. This completely eliminates the common issue of edge collapse often found in mattresses."

### Cotton Knitted Fabric Bed

The mattress is made of knitted fabric containing 280gr cotton per m2.

### Hycare Hygiene Protection

"Our fabric is equipped with Hycare hygiene protection, which uses nanotechnology to help prevent the growth and survival of various types of bacteria, mites, bedbugs, and viruses."

"Gold mattresses are designed to provide the best sleep quality and ensure that our foldable wall bed models can be used with maximum comfort and safety, with appropriate thickness and weight calculations."
